1. You need to troubleshoot the order workflow. What should you do?

- A. Review the run history.
- B. Review the trigger history.
- C. Review the API connections.
- D. Review the activity log.

Answer: BD

2. You need to access user claims in the e-commerce web app. What should you do first?

-
- A. Update the e-commerce web app to read the HTTP request header values.
 - B. Assign the Contributor RBAC role to the e-commerce web app by using the Resource Manager create role assignment API.
 - C. Write custom code to make a Microsoft Graph API call from the e-commerce web app.
 - D. Using the Azure CU enable Cross-origin resource sharing (CORS) from the e-commerce checkout API to the e-commerce web app

Answer: C

3.You need to provision and deploy the order workflow. Which three components should you include?

- A. Workflow definition
- B. Connections
- C. Resources
- D. Functions
- E. On-premises Data Gateway

Answer: C, D, E

4.You develop an app that processes data packages that are less than 10 KB. The solution processes and then deletes the data packages. Data must be processed by only one instance and must persist if the app is reset but not after it is processed. You need to select a storage technology for the solution while minimizing costs. Which data storage service should you use?

- A. Azure Table Storage
- B. Azure Queue Storage
- C. Azure Blob Storage
- D. Azure Redis Cache
- E. Azure SQL Database

Answer: C

5.You are developing an internal website for employees to view sensitive data. The website uses Azure Active Directory (AAD) for authentication. You need to implement multifactor authentication for the website. What should you do? Each correct answer presents part of the solution.

-
- A. In Azure AD, create a new conditional access policy.
 - B. In Azure AD, enable application proxy.
 - C. Configure the website to use Azure AD B2C.
 - D. In Azure AD conditional access, enable the baseline policy.
 - E. Upgrade to Azure AD Premium.

Answer: C, E

6. You develop a solution that uses an Azure SQL Database to store user information for a mobile app. The app stores sensitive information about users. You need to hide sensitive information from developers that query the data for the mobile app. Which three items must you identify when configuring dynamic data masking? Each correct answer presents a part of the solution.

- A. Column
- B. Table
- C. Trigger
- D. Schema
- E. Index

Answer: ABD

7. You use Azure Table storage to store customer information for an application. The data contains customer details and is partitioned by last name. You need to create a query that returns all customers with the last name Smith. Which code segment should you use?

- A. `TableQuery.GenerateFilterCondition("LastName", QueryComparisons.Equal, "Smith")`
- B. `TableQuery.GeneratefilterCondition("PartitionKey", QueryComparisons. Equal, "Smith")`
- C. `TableQue.GenerateFilterCondition("PartitionKey", Equals, "Smith")`
- D. `TableQuery. GenerateFilterCondition("LastName", Equals, "Smith")`

Answer: D

8. You need to implement the purchase requirement. What should you do?

-
- A. Use the Speech Service API to send the user's voice and the Bot Framework REST API conversation operations to recognize intents.
 - B. Use the Bot Framework REST API attachment operations to send the user's voice and the Speech Service API to recognize intents.
 - C. Use the Direct Line REST API to send the user's voice and the Speech Service API to recognize intents.
 - D. Use the Bot Framework REST API conversation operations to send the user's voice and the Speech Service API to recognize intents.

Answer: D

9. You need to resolve the chatbot issue. What should you do?

- A. Update the bot to store and retrieve state data.
- B. Update the bot to overload the Dialog class constructor and invoke the root dialog.
- C. Update the bot to pass native metadata to a channel in the Activity object's Channel Data property.

D. Use the Bot Framework Connector to send and receive activities.

Answer: A

10. You need to update the chatbot to greet the user when they sign in. Which two rich card formats can you use? Each correct answer presents a complete solution.

A. Thumbnail

B. Adaptive

C. Sign-in

D. Animation

E. Hero

Answer: BE
